Values represent median anomalies, relative to the recent past (1995–2014), for each reporting period: Near-term (2021–2040); mid-term (2041–2060); intermediate-term (2061–2080); and long-term (2081–2100). Values in brackets are the inter-model range envelopes (the range of annual median trends across all ESMs), for each reporting period.
